|  | GAUTENG PROVINCE | GAUTENG PROVINCE <br> MATHEMATICS - ANNUAL TEACHING PLAN -GRADE 10 Final GRADE 10 ATP 2022 :12 JANUARY 2022 |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| DATE | TOPIC | CONTENT | F | ASSESSMENT | Date Completed | Completed |
| TERM 1 |  |  | 2 TASKS FOR TERM 1 |  |  |  |
| Week 1 12/1-14/1 (3 days) | Algebraic Expression | 1. Understand that real numbers can be rational or irrational. <br> 2. Establish between which two integers a given simple surd lies |  |  |  | 3\% |
| Week 2 $17 / 1-21 / 1$ | Algebraic Expression | 3. Round real numbers to an appropriate degree of accuracy. <br> 4. Multiplication of a binomial by a trinomial. |  |  |  | 6\% |
| $\begin{gathered} \text { Week } 3 \\ 24 / 1-28 / 1 \end{gathered}$ | Algebraic Expression | 5. Factorization to include types taught in Grade 9 and: <br> - trinomials <br> - grouping in pairs <br> - sum and difference of two cubes | F | Investigation / Project ) <br> SBA marks: 15\% |  | 9\% |
| $\begin{gathered} \text { Week } 4 \\ 31 / 1-04 / 2 \end{gathered}$ | Algebraic Expression | 6. Simplifying, adding and subtracting algebraic fractions using factorization with denominators of cubes (limited to sum and difference of cubes). |  |  |  | 12\% |
| $\begin{gathered} \text { Week } 5 \\ 07 / 2-11 / 2 \end{gathered}$ | Exponents, equations and inequalities | 1. Revise laws of exponents learnt in Grade 9 where $x, y>0 ; m, n \in \mathbf{Z}:$ <br> - $\quad x^{m} \times x^{n}=x^{m+n}$ <br> - $\quad x^{m} \div x^{n}=x^{m-n}$ <br> - $\quad\left(x^{m}\right)^{n}=x^{m n}$ <br> - $\quad x^{m} \times y^{m}=(x y)^{m}$ <br> Also, by <br> definition: $x^{-n}=\frac{1}{x^{n}}, x \neq 0$ and $x^{0}=1, x \neq 0$ <br> 2. Use the laws of exponents to simplify expressions and solve equations, accepting that the rules also hold for $m, n \in \mathbf{Q}$. <br> 1. Revise the solution of linear equations. <br> 2. Solve quadratic equations (by factorisation). |  |  |  | 15\% |
| $\begin{gathered} \text { Week } 6 \\ 14 / 2-18 / 2 \end{gathered}$ | Exponents, equations and inequalities | 3. Solve simultaneous linear equations in two unknowns. <br> 4. Solve word problems involving linear, quadratic or simultaneous linear equations |  |  |  | 18\% |
| $\begin{gathered} \text { Week } 7 \\ 21 / 2-25 / 2 \end{gathered}$ | Equations and inequalities | 5. Solve literal equations (changing the subject of a formula). |  |  |  | 21\% |

| 2022 Mathematics |  |  |  | ATP Grade 10 |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | 6. Solve linear inequalities (and show solution graphically). Interval notation must be known. |  |  |  |
| $\begin{gathered} \text { Week } 8 \\ 28 / 2-04 / 3 \end{gathered}$ | Euclidean Geometry | 1. Revise basic results established in earlier grades regarding lines, angles and triangles, especially the similarity and congruence of triangles |  |  | 24\% |
| $\begin{gathered} \text { Week } 9 \\ 07 / 3-11 / 3 \end{gathered}$ | Euclidean Geometry | 2. Investigate alternative definitions of various polygons (including the isosceles, equilateral and right-angled triangle) <br> 3. Define the following special quadrilaterals the Kite, parallelogram, rectangle, rhombus, square and trapezium. <br> 4. Investigate and make a conjecture about the properties of the sides, angles, diagonals and areas of these quadrilaterals. | F | Test SBA marks: $14 \%$ | 27\% |
| $\begin{aligned} & \text { Week } 10 \\ & 14 / 3-17 / 3 \\ & \text { (4 days) } \end{aligned}$ | Euclidean Geometry | The following proofs are examinable <br> - The opposite sides and angles of a parallelogram are equal. <br> - The diagonals of a parallelogram bisect each other. <br> - If one pair of opposite sides of a quadrilateral are equal and parallel the quadrilateral is a parallelogram. |  |  | 30\% |

END OF TERM 1 SCHOOLS CLOSES ON 17/03/2022

| TERM 2 2 TASKS FOR TERM 2 |  |  |  |  |  |  |
| Week 1 05/4-08/4 (4 days) | Trigonometry | 1. Define the trigonometric ratios $\sin \theta, \cos \theta$ and $\tan \theta$ Using the right - angled triangle. <br> 2. Extend the definitions of $\sin \theta, \cos \theta$ and $\tan \theta$ for $0^{\circ} \leq \theta \leq 360^{\circ}$ <br> 3. Define the reciprocal of the trigonometric ratios $\operatorname{cosec} \theta, \sec \theta$ and $\cot \theta$, using the right - angled triangles(these three reciprocals should be examined in grade 10 only) |  |  |  | 33\% |
| $\begin{gathered} \text { Week } 2 \\ 11 / 4-15 / 4 \\ \text { (4 days) } \end{gathered}$ | Trigonometry | 4. Use a diagram to determine the numerical values of ratios for angles from $0^{\circ}$ to $360^{\circ}$ <br> 5. Derive values of the trigonometric ratios for the special cases ( without using a calculator $\theta \in\left\{0^{\circ} ; 30^{\circ} ; 45^{\circ} ; 60^{\circ} ; 90^{\circ}\right\}$ |  |  |  | 36\% |
| $\begin{gathered} \text { Week } 3 \\ 18 / 4-22 / 4 \\ \text { (4 days) } \end{gathered}$ | Trigonometry | 6. Solve simple trigonometric equations for angles between $0^{\circ}$ and $90^{\circ}$ <br> 7. Solve two dimensional Problems involving right-angled triangles |  |  |  | 39\% |
| $\begin{gathered} \text { Week } 4 \\ 25 / 4-29 / 4 \\ (4 \quad \text { Days }) \end{gathered}$ | Number patterns | Patterns: Investigate number patterns leading to those where there is a constant difference between consecutive terms, and the general term (without using a formula-see content overview) is therefore linear. |  | ASSIGNMENT SBA marks: 15\% |  | 42\% |
| $\begin{gathered} \text { Week } 5 \\ 02 / 5-06 / 5 \\ \text { (4 days) } \end{gathered}$ | Functions (including trigonometric Functions | 1.The concept of a function, where a certain quantity (output value) uniquely depends on another quantity (input value). Work with relationships between variables using tables, graphs, words and formulae. Convert flexibly between these representations. <br> Note: that the graph defined by $y=x$ should be known from Grade 9 . |  |  |  | 45\% |
| $\begin{gathered} \text { Week } 6 \\ 09 / 5-13 / 5 \end{gathered}$ | Functions (including trigonometric Functions | 2. Point by point plotting of basic graphs defined by $\begin{aligned} & y=x^{2}, \quad y=\frac{1}{x} \text { and } y=b^{x} ; b>0 \text { and } \\ & b \neq 1 \end{aligned}$ |  |  |  | 48\% |

|  |  | to discover shape, domain (input values), range (output values), <br> asymptotes, axes of symmetry, turning points and intercepts on the axes (where applicable). |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| $\begin{gathered} \text { Week } 7 \\ 16 / 5-20 / 5 \end{gathered}$ | Functions (including trigonometric Functions | 2. Point by point plotting of basic graphs defined by <br> $y=x^{2}, \quad y=\frac{1}{x}$ and $y=b^{x} ; b>0$ and $b \neq 1$ <br> to discover shape, domain (input values), range (output values), <br> asymptotes, axes of symmetry, turning points and intercepts on the axes (where applicable). | F |  | 51\% |
| $\begin{gathered} \text { Week } 8 \\ 23 / 5-27 / 5 \end{gathered}$ | Functions (including trigonometric Functions | 3. Investigate the effect of $a$ and q on the graphs defined by $y=a \cdot f(x)+q$, where $\begin{aligned} & f(x)=x, f(x)=x^{2}, f(x)=\frac{1}{x} \text { and } \\ & f(x)=b^{x}, b>0, b \neq 1 \end{aligned}$ <br> Sketch graphs find the equations of given graphs and interpret graphs. <br> Note: Sketching of the graphs must be based on the observation of the effect of $a$ and $q$ |  |  | 55\% |
| Week 9 $30 / 5-03 / 06$ | Functions (including trigonometric Functions | Study the effect of $a$ and $q$ on the graphs defined by: <br> - $y=a \sin \theta+q$; <br> - $y=a \cos \theta+q_{\text {; and }}$ $\theta \in\left[0^{\circ} ; 360^{\circ}\right]$ |  | TEST <br> SBA marks: 14\% | 58\% |
| Week 10 06/6-10/6 | Functions (including trigonometric Functions | - $y=a \tan \theta+q$ <br> where $a$ and $q \in Q$ and $\theta \in\left[0^{\circ} ; 360^{\circ}\right]$. <br> 6. Sketch graphs find the equations of given graphs and interpret graphs. <br> Note: Sketching of the graphs must be based on the observation of the effect of $a$ and $q$. |  |  | 61\% |
| Week 11 13/6-17/6 ( 3 days) | Measurement | 1.Revise the volume and surface areas of rightprisms and cylinders. <br> 2. Study the effect on volume and surface area when multiplying any dimension by a constant factor k . |  |  | 64\% |
| Week 12 $20 / 6-24 / 6$ | Measurement | 3. Calculate the volume and surface areas of spheres, right pyramids, right cones and combination of those objects (figures). |  |  | 67\% |
| END OF TERM 2 SCHOOLS CLOSES ON 24/06/2022 |  |  |  |  |  |

| DATE | TOPIC | CONTENT | F | ASSESSMRNT | Date Completed | Completed |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| TERM 3 |  |  | 2 TASKS FOR TERM 3 |  |  |  |
| $\begin{gathered} \text { Week } 1 \\ \text { 19/7-22/7 } \\ \text { (4days) } \end{gathered}$ | Statistics | 1. Revise measures of central tendency in ungrouped data. <br> 2. Measures of central tendency in grouped data: calculation of mean estimate of grouped and ungrouped data and identification of modal interval and interval in which the median lies. <br> 3. Revision of range as a measure of dispersion and extension to include percentiles, quartiles, interquartile and semi-inter-quartile range. |  |  |  | 70\% |
| $\begin{gathered} \text { Week } 2 \\ 25 / 7-29 / 7 \end{gathered}$ | Statistics | 4. Five number summary (maximum, minimum and quartiles) and box and whisker diagram. <br> 5. Use the statistical summaries (measures of central tendency and dispersion), and graphs to analyse and make meaningful comments on the context associated with the given data. <br> 6. Represent the data on bar graphs, line graphs and Histogram |  |  |  | 73\% |
| $\begin{gathered} \text { Week } 3 \\ 01 / 8-05 / 8 \end{gathered}$ | Probability | 1.The use of probability models to compare the relative frequency of events with the theoretical probability. |  |  |  | 76\% |
| $\begin{gathered} \text { Week } 4 \\ 08 / 8-12 / 8 \\ \text { (3 days) } \end{gathered}$ | Probability | 2. The use of Venn diagrams to solve probability problems, deriving and applying the following for any two events in a sample space $S$ : $P(A \text { or } B)=P(A)+P(B)-P(A \text { and } B)$ <br> A and B are Mutually exclusive if $P(A$ and $B)=0$; <br> $A$ and $B$ are complementary if they are mutually exclusive; and $P(A)+P(B)=1$ <br> Then $P(B)=P(\operatorname{not}(A))=1-P(A)$ |  | TEST <br> SBA marks: 14 |  | 79\% |
| $\begin{gathered} \text { Week } 5 \\ 15 / 8-19 / 8 \end{gathered}$ | Finance and growth | 1. Use the simple and compound growth formulae $[A=P(1+i n)$ and $A=P(1+i)^{n}$ ] to solve problems, including interest, hire purchase, inflation, population growth and other real-life problems. |  |  |  | 82\% |
| $\begin{gathered} \text { Week } 6 \\ 22 / 8-26 / 8 \end{gathered}$ | Finance and growth | 2.Understand the implication of fluctuating foreign exchange rates (e.g. on the petrol price, imports, exports, overseas travel). |  |  |  | 85\% |
| $\begin{gathered} \text { Week } 7 \\ 29 / 8-02 / 9 \\ \hline \end{gathered}$ | Analytical Geometry |  |  |  |  | 88\% |

ATP Grade 10

|  |  | Represent geometric figures on a Cartesian co-ordinate system. <br> Derive and apply for any two points $\left(x_{1} ; y_{1}\right)$ and $\left(x_{2} ; y_{2}\right)$ the formulae for calculating the: <br> 1. distance between the two points; |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| $\begin{gathered} \text { Week } 8 \\ 05 / 9-09 / 9 \end{gathered}$ | Analytical geometry | 2. gradient of the line segment connecting the two points (and from that identify parallel and perpendicular lines); and 3. Coordinates of the mid-point of the line segment joining the two points. |  |  | 91\% |
| $\begin{gathered} \text { Week } 9 \\ 12 / 9-16 / 9 \end{gathered}$ | Euclidean Geometry | The following proofs are examinable <br> - The diagonals of a rectangle are equal. <br> - The diagonals of a rhombus bisect each other at right angle and bisect the interior angles. | F | TEST SBA marks: 14\% | 94\% |
| $\begin{gathered} \text { Week } 10 \\ 19 / 9-23 / 9 \end{gathered}$ | Euclidean Geometry | The following theorem is examinable <br> - The line segment joining the midpoints of two sides of a triangle is parallel to the third side and equal to half the length of the third side <br> Solve problems and prove riders using the properties of parallel lines, triangles and quadrilaterals |  |  | 97\% |
| $\begin{gathered} \text { Week 11 } \\ 26 / 9-30 / 9 \end{gathered}$ | Euclidean Geometry | Solve problems and prove riders using the properties of parallel lines, triangles and quadrilaterals |  |  | 100\% |
